Index to Volume LXXIII

Subjects

Affiliation

value of a brand or franchise affiliation for hotels, 78–86

Affordable housing

basic elements of Low Income Housing Tax Credit program, 39–46

All appropriate inquiries rule

required inquiries related to contaminated properties, 148–151

valuation issues related to the all appropriate inquiries rule, 151–153

Allocation

allocation of day spa net income to hotel business intangibles, 408–412

Apartments

use of tax credits by multifamily housing developers who provide low-cost housing, 47–55

Appraisal Institute

Appraisal Institute's development of Residential Summary Appraisal Report, 251–255

Appraisal practice standards

practice standards applicable to estimating environmental stigma, 362

practice standards applicable to valuation of raw land, 389

Approaches to value

ballpark approach to determine land value, 26–29

cash flow approach to determine land value, 27–38

market history of the subject as a fourth approach to value, 175–182

treatment of development costs and developer's profit under subdivision development method and the sales comparison approach, 384–390

Assemblage

increasing returns through increasing size, 296–304

Assisted-living facilities

valuation issues of assisted-living facilities under the Housing and Urban Development (HUD) lending program, 56–67

Band-of-investment techniques

extracting the overall capitalization rate using the band-of-investment technique, 68–69

Best fit curve

use of best fit curve technique for site size adjustment, 397–407

Bilateral monopoly

one buyer and one seller exists for assemblage property, 297–298

Business enterprise value (BEV)

estimating BEV for hotels using paired comparison, 78–86

Brownfields

valuing residential redevelopment of brownfields, 288–295

Capitalization rate

deconstructing overall capitalization rates, 68–77

effect of property type on overall capitalization rate, 66–73

effects of quality segmentation on overall capitalization rate, 69

equity capitalization rate, 70–72

explaining variation and differences in overall capitalization rates, 68–77

loan-to-value rate, 69–72

mortgage capitalization rates, 68–73

principle of substitution, 68

valuation issues under the Housing and Urban Development (HUD) lending program, 56–67

Cellular phone towers

effect of cell phone towers on prices of residential properties, 256–277

health effects of cell phone towers, 258–259

resident and nonresident perceptions of cell phone towers, 262–266

Chemical releases

effect of type of chemical releases on sale prices, 183–197

Comparables

ensuring suitable comparables of brownfields, 288–295

Condemnation

valuation of developable land in condemnation cases, 384–390

Condominium litigation

defective construction claims and their effect on condominium sale prices, 391–396

Contamination

distance from contamination and sale prices, 87–97

effect of creosote contamination on sale prices, 87–97

Environmental Protection Agency's all appropriate inquiries rule, 146–153

measuring stigma effects using multiple regression analysis, 363–369

relevant property characteristics in instances of environmental contamination, 147–148

valuing brownfields, 288–295

Contingent valuation

contingent valuation applied to assemblage valuation, 301

Index to Volume LXXIII

Chemical releases

effect of type of chemical releases on sale prices, 183–197

Comparables

ensuring suitable comparables of brownfields, 288–295

Condemnation

valuation of developable land in condemnation cases, 384–390

Condominium litigation

defective construction claims and their effect on condominium sale prices, 391–396

Contamination

distance from contamination and sale prices, 87–97

effect of creosote contamination on sale prices, 87–97

Environmental Protection Agency's all appropriate inquiries rule, 146–153

measuring stigma effects using multiple regression analysis, 363–369

relevant property characteristics in instances of environmental contamination, 147–148

valuing brownfields, 288–295

Contingent valuation

contingent valuation applied to assemblage valuation, 301

Contingent valuation survey

using contingent valuation surveys to evaluate impact of toxic mold on property values, 159–162

Contributory value

contributory value of property to an assemblage, 298–304

Creosote

effect of creosote contamination on sale prices, 87–97

Deed restrictions

effectiveness as a tool for notification of contamination, 288–295

Defective construction

effect of lawsuit for defective construction on the value of condominiums, 391–396

Developer profit

compensation for lost developer's profit in expropriation cases, 384–390

Development value

valuation of property with development potential, 24–38

Diminution in value

effect of lawsuit for defective construction on the value of condominiums, 391–396

Distressed property

appraising distressed property, 210–215

"as is" market value of distressed property, 212–215

"as stabilized" value of distressed property, 212–215

characteristics of distressed property, 210

entrepreneurial profit, 211–212

highest and best use analysis of distressed property, 210–211

specific valuation considerations for valuation of distressed property, 211–212

Economic damages

elements of damages in claims for defective construction, 391–393

Emergency Planning and Community Right-to-Know Act (EPCRA)

reporting of toxic releases, 184–186

Eminent domain

takings by local governments for private development, 136–145, 348–362

Environmental contamination

effect of type of chemical releases on sale prices, 183–197

Environmental Protection Agency's all appropriate inquiries rule, 146–153

measuring stigma effects using multiple regression analysis, 363–369

relevant property characteristics in instances of environmental contamination, 147–148

valuing brownfields, 288–295

Expropriation

claims for loss of developer's profit and for increased development costs in expropriation cases, 384–390

Fannie Mae

appropriate use of Fannie Mae appraisal forms, 249–251

test appraisal forms, 15–23

Feasibility studies

using feasibility studies to identify land value of a site with latent value, 24–38

Geographic information systems (GIS)

use of GIS to measure distances in the analysis of property values and depict contamination, 89–92, 96

Graphing technique

application of the best fit curve as a size adjustment estimator, 397–407

Hedonic pricing model

analysis of effect of canal frontage on price using hedonic pricing model, 170–174

analysis of effect of chemical releases on sale prices using hedonic pricing model, 183–197

prediction ability of hedonic pricing model, 207–209

using hedonic pricing model to relate sale price to characteristics of the home, 198–209

using hedonic pricing model to study effect of cellular phone tower, 256–271

using linear, quadratic, and cubic functional forms to predict sale prices, 198–209

Highest and best use

assemblage conclusion requires most likely purchaser be an investor, 298–304

Holdout sample

using holdout sample to check for prediction ability, 202–209

Hotels

estimating intangible asset value of hotels due to brand or franchise affiliation, 78–86

valuation of business intangibles for hotel day spas, 408–412

Housing and Urban Development (HUD) lending program

valuation issues for assisted-living and nursing facilities under the HUD lending program, 56–67

Housing bubble

housing bubble in vacation home market, 240–248

Housing investment

risk in housing investment, 370–383

Housing market

public and private housing market prices, 309–310

Housing policy

public housing policy in Hong Kong, 307–309

Housing returns

determinants of investment returns on housing, 376–377

influence of location and other housing features on returns, 370–383

probability of loss on sale in housing transaction, 377–379

Homeownership

risk in investment in homeownership, 370–383

Increased development costs

claims for increased development costs in expropriation claims, 384–390

Intangible assets

estimating value of identified intangible asset for hotels, 78–86

valuation of business intangibles for hotel day spas, 408–412

Land Use Restriction Agreement (LURA)

state and federal requirements to receive tax credits, 48–49

Low Income Housing Tax Credit (LIHTC) program

calculating rent under the LIHTC program, 43–45

calculating tax credit amount under the LIHTC program, 40

fundamentals of how the LIHTC program works, 39–46

provisions and restrictions of the LIHTC program, 47–49

valuation of LIHTC properties, 49–55

Management costs

valuation issues under the Housing and Urban Development (HUD) lending program, 56–67

Market history

valuation using the market history of the subject property, 175–182

Market perceptions

determining whether market perceptions of cellular phone towers impact property values, 256–277

Market value

"as is" market value, 212–215, 385–387

determining total market value of developable land in expropriation claims, 384–390

market value requires many buyers and many sellers, 297

Micropolitan areas

affordability of housing in micropolitan areas, 416–418

definition and description of micropolitan areas, 413–416

housing values in micropolitan areas, 417–419

policy implications of recently created micropolitan area designation, 419–420

Multifamily Accelerated Processing Program (MAP)

valuations according to the MAP Guide, 56–67

Percentage mean absolute error (PMAE)

the mean absolute value of the error in predicting sale prices, 207–209

Property flipping

Fannie Mae response to practice of property flipping, 17

Property value

impact of cell phone towers on property value, 256–277

Property value diminution

effects of toxic mold, 156–166

Proprietary income

valuation issues under the Housing and Urban Development (HUD) lending program, 56–67

Public use

court definition of public use in eminent domain cases, 136–145, 348–362

Reasonably probable

market expectations of use drive highest and best use conclusion, 298–304

Regression analysis

using an HP-12C calculator for simple linear regression, 318–320

using multiple regression analysis to measure risk related to environmental contamination, 363–369

Residential property

influence of artificial water canals on price of residential properties, 167–174

Residential Summary Appraisal Report

residential form for use when Fannie Mae form is not appropriate, 251–255

Residual value

residual development value of property, 24–38

Rental rate restrictions

rental rate restrictions for Low Income Housing Tax Credit properties, 52–59

Risk

distinguishing between uncertainty and variability, 35–38

holding periods and risk, 370–379

measuring environmental risk, 363–369

nonsystemic risk in housing transactions, 370–379

Sale prices

effect of canal frontage on sale price of homes, 167–174

effect of contamination on sale prices, 87–97

effect of prior environmental contamination on sale prices, 363–369

effect of public housing on sale prices, 305–317

effect of toxic substances on sale prices of homes, 183–197

Sales comparison approach

treatment of development costs and developer's profit in the sales comparison approach, 384–390

using regression analysis with sales comparison approach, 363–369

Second home market

housing bubble in second home market, 240–248

Separation

separation of day spa intangibles from hotel realty value, 408–412

Skilled nursing facilities

valuation issues under the Housing and Urban Development (HUD) lending program, 56–67

Site size

technique to estimate the adjustment magnitude for site size, 397–407

Spas

net income attributable to business intangibles for hotel-operated day spas, 408–412

Stigma

effects of pollution on home values, 87–97

effect of prior environmental condition on sale prices, 363–369

stated preferences versus revealed preferences, 368–369

Subdivision development method

treatment of development costs and developer's profit in the subdivision development method, 384–390

Subsidized housing

impact of subsidized housing on private housing values, 305–317

Substitution principle

cointegration regression, 73, 76–77

how the substitution principle relates to differences in overall capitalization rates among property types and asset classes, 68–77

Tangible and intangible assets

valuation issues for assisted-living and nursing facilities under the Housing and Urban Development (HUD) lending program, 56–67

Tax credits

incentives used by developers to reduce development costs, 47–55

Telecommunications infrastructure properties

distinctive elements of telecommunications infrastructure properties, 279–282

market analysis of telecommunication infrastructure properties, 282–284

valuation methodology for telecommunications infrastructure properties, 284–287

Timber

discounted cash flow valuation problems of immature and premerchantable timber stands, 98–106

holding value premium of timber stands, 98–106

Toxic mold

review of effects of toxic mold on real estate value, 156–166

Toxic Release Inventory (TRI) data

availability of toxic release information and its effect on sale prices, 183–197

Uncertainty

uncertainty in the development of property, 24–38

Uniform Residential Appraisal Report (URAR)

appropriate use of Fannie Mae forms, 249–251

requirement for sales history in URAR, 175

revisions to the Uniform Residential Appraisal Report, 15–23

***Uniform Standards of Professional Appraisal Practice* (USPAP)**

COMPTENCY RULE as it applies to evaluating environmental stigma, 363

Standards Rule 1-5, 175–176

Valuation

effect of public/subsidized housing on value of private housing, 305–317

proposed model for valuing a LIHTC property, 47–55

valuation of net income attributable to business intangibles for hotel-operated day spas, 408–412

Voluntary cleanup programs

characteristics of state voluntary cleanup programs, 288–290

Water canals

influence of water canals on residential sale prices, 167–174

Cases in Brief

Accidental damages are not compensable taking of property, 124

Appellate court may review the validity of reasons for rejecting expert testimony, 4

Assisted-living facility does not serve a charitable purpose so does not qualify for property tax exemption, 3

Charitable organization's headquarters not entitled to property tax exemption, 121

Charity's independent-living units entitled to property tax exemption, 333

Church entitled to tax exemption on several parcels of land, 334–335

Church must prove it is a purely public charity in order to receive tax exemption, 3–4

City to pay for expert witnesses in condemnation case, 226–227

City property that abuts private property not a taking without just compensation, 334

Classification of property dependent on its primary use, 227

Declining property value not cause to reevaluate taxpayer's property, 227–228

Developer awarded reimbursement for town's taking of property without just compensation, 121

Environmental impact statement not needed for town to condemn property for roadway expansion, 121–122

Expert testimony based on experience deemed reliable, 122

Expert testimony on proximity damages and reduction of rental value admissible into evidence in eminent domain case, 333–334

Fair market value determined by current highest and best use, 123–124

Grant funds considered in calculating the fair market value of property in an eminent domain proceeding, 335–336

Income capitalization approach appropriate to measure value of landfill under a conditional use permit, 226

Inverse condemnation requires an affirmative, positive, aggressive act, 1

Land use regulation not a taking of property without just compensation, 225–226

Land use restriction is not an unconstitutional taking of property without just compensation, 335

Landowner deemed qualified to assess highest and best use of his property in eminent domain case, 333

Municipal hospital's assisted-living facilities are exempt from property taxes, 1

No damages awarded for diminished market perception in condemnation case, 225

Nonchartered city cannot condemn property outside its boundaries, 2

Partial charitable exemption for nonprofit nursing facility, 124

Planning board's designation does not result in inverse condemnation, 2–3

Property used for educational purposes qualifies for tax exemption, 336

Special benefits one form of just compensation, 122–123

Speculative appraisal not relevant in tax assessment case, 228

Temporary moratorium on land development is not a taking without just compensation, 225

Testimony regarding value of land's future use deemed inadmissible, 2
